

Do your Doctorate at the Centre for Transdisciplinary Neurosciences Rostock (CTNR)

Who we are

The Centre for Transdisciplinary Neurosciences Rostock (CTNR) represents one of the three main scientific areas at the University Medical Centre Rostock. The overall aim of the CTNR is to identify and target mechanisms in neurodegeneration to implement innovative therapeutic concepts for primary and secondary neurodegenerative processes.

Joint applications

We would like to offer young scientists from abroad the opportunity to conduct their PhD training within the CTNR framework. To this end, we offer support for interested students to apply for a DAAD Research Grant in Rostock.

Who can apply?

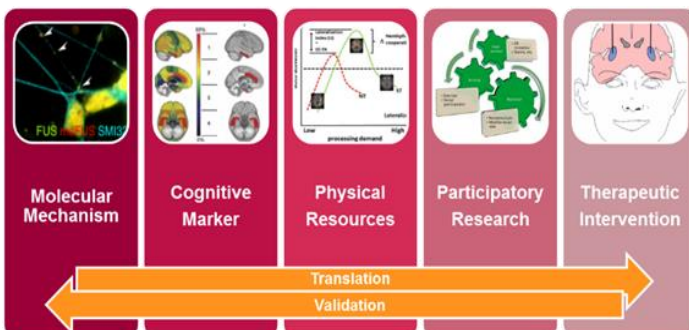

Excellently-qualified young academics and scientists who have completed a Master's degree or Diploma by the time they begin their grant-supported research.

How long lasts the funding?

A maximum of four years; the length of the grant is decided by a selection committee of the DAAD and depends on the project in question and the applicant's work schedule. The grants are initially awarded for a maximum of one year. Extensions depend on whether the selection committee considers the previous award period to have been successfully completed.

What is funded?

Monthly payments of € 1,200.- for doctoral candidates. Payments towards health, accident and personal liability insurance cover. One-off research allowance. Travel allowance.

Procedure

- ✓ Sent us your letter of intent (max. 1 page), your research interest and your diplomas
- ✓ We look internally for an appropriate supervisor
- ✓ The supervisor will contact you and you will prepare a project proposal under his/her supervision
- ✓ You will submit the proposal to the DAAD
- ✓ Once the proposal is positively evaluated you can plan your research period together with your supervisor
