CTNR NEWS

Successful completion of the CTNR workshop about DFG research grants

The scientific coordinator of the CTNR, Virginia Bolowski, initiated successfully the first workshop about the DFG research grant (Sachbeihilfe). The workshop was about the content, structure and submission process of a research grant at the German Research Foundation. 26 participants of various institutes of the University Medical Centre got the possibility to get in touch with this funding instrument by doing practical exercises and interacting with each other. The workshop is part of the CTNR qualification program to strengthen grant efforts within the University Medical Centre Rostock.
