

Centre for Transdisciplinary Neurosciences Rostock

Newsletter about Funding Opportunities, Training and Events in Neurosciences

September 2018

About

The monthly newsletter is a free service of the Centre for Transdisciplinary Neurosciences Rostock¹. [Here](#), you can download and subscribe to it.

General information

- [ELFI](#) is an information brokerage system which supports its users in keeping up-to-date information on funding opportunities referring to the original data source. As a customer-oriented service, ELFI provides information for students, scientists, research managers and administrators.
- [BMBF](#): The Federal Funding Advisory Service on Research and Innovation informs potential applicants about the federal research structure, funding programmes and the persons to contact as well as about current funding priorities and initiatives.
- [DFG](#): Current calls for proposals as well as other general information on the various funding programmes.
- [Foundations](#): Search for funding bodies at the Association of German Foundations.
- [European Union](#): Funding opportunities and search for new or closed calls of the programmes.

News

Clinician Scientist Program at the University Medicine Rostock

To improve the recruiting of young medical scientific researchers and to support their specific challenges concerning compatibility of research and clinical work, the University Medicine Rostock has (UMR) established an overall clinician scientist program ("Strukturprogramm Clinician Scientist").

In order to create efficient incentives for an academic/research career besides medical training, 15 positions for an advanced training in a clinical specialty/subspecialty (ärztliche Weiterbildungsstellen) are advertised.

The key element of the program is the research protected time of two years within the specialist/subspecialist training time to conduct a theoretical research project. The program consists of an individual clinical, scientific and soft skill educational curriculum and is structured into a Junior and an Advanced Clinician Scientist Program. The positions are available now: [job advertisement](#).
